

RGR1 Rescue Tripod

Accredited To: EN795

Material: Aluminium cast and extruded legs

Fittings: EN795 attachment points

Weight: 17.6 kgs

Features: Portable and universally adjustable

Min / Max Height : 1.68m - 2.67m

Packed Length : 1.37m

SWL: 200kg

The RGR1 is portable, lightweight and is easy to erect on site. It has adjustable lower and middle legs at 80mm intervals to adapt and adjust to uneven surfaces and varying ground conditions. There are 2 additional anchorage points (SWL 200kg each) on the underside of the head for additional primary/secondary systems.

This unit has many applications such as confined access, entry, egress, rescue, retrieval, manholes, silos & trenches, etc.

The RGR1 is extremely versatile and is recommended for use with the side attachment of the RGR7 rescue winch or the RGA4 fall arrest & rescue block.

If you have a difficult surface we have a special set of feet which should sort the problem.

(For details of daily inspection procedures, see the info sheet)
