

## PRODUCT DATA SHEET

Product ID           RGH1  
Description:         Rear D Harness

Accredited to:      EN 361: 2002  
Web material:       45mm water repellent polyester  
Fittings:           High tensile steel alloy  
Weight:             0.95kg  
Features:           

- Rear attachment point
- Fitted with rip stitch indicators
- Fully adjustable

  
Sizes:               Small, Standard, Large and X-Large  
Please refer to the harness size guide

The RGH1 harness is a basic access harness fitted with a rear D only. This harness is used primarily with a fall arrest lanyard to provide an operative with basic fall protection.

- When used in conjunction with a twin leg lanyard (RGL3), the harness can be used for tower climbing, scaffold and general steel erecting.
- Suitable for use with fall arrest blocks, however we recommend the addition of the RGL4 extension strop to facilitate easy connection.
