                          Please refer to the harness size guide

The RGH16 is a 'step-in' multitask harness and will allow operatives to access almost any area in safety using a combination of the RidgeGear products available.

In addition there is the added benefit of 2 side D work positioning D rings on a comfortable support pad, and a further ventral front D ring positioned at the waist for sit suspension and / or work positioning. This comfortable harness is designed for operatives who spend long hours working at height and in exposed areas.

Comfort waist and leg support pads are provided along with quick release buckles.
