

Dräger Pac® 3500 Single-Gas Detection Device

Fast and reliable, accurate and maintenance-free for up to two years:
Dräger Pac® 3500 is ideal for the industrial personal monitoring of carbon monoxide, hydrogen sulphide or oxygen.

Tightly fastening crocodile clip
Easy to attach, e.g. on the clothes

Unique gas access entry
Gas access from the top
and from the front side

Robust housing
Also suitable for very rough
environments

**Clear, non-verbal (pictorial)
concentration display**
All important information
at a glance

Sensor designation
Designation of the sensor types
in color and in writing

360° alarm
Easily visible from all sides

D-1328-2009

Benefits

Compact and robust

The Dräger Pac 3500 is light-weight and compact, offering excellent wear comfort. The stable, rotatable crocodile clip allows it to be securely and safely attached to clothing or belts. The device features a shock-proof, chemical-resistant rubber coating and meets the requirements of IP 68. It is, therefore, very suitable for rough working environments.

Large, language-free display

The large, language-free display continuously shows the gas concentration and simultaneously displays the corresponding measurement unit. The background light ensures that these values can be clearly read even in the dark.

Safety in any situation

The Dräger Pac 3500 is equipped with the Dräger XXS sensor. It has been carefully positioned to allow gas intake from both the top and the front of the device. Even if a gas inlet is accidentally been covered, a continuous measurement is guaranteed.

Triple alarm

With the Dräger Pac 3500, no alarm goes unnoticed: alongside a clearly audible, multi-tone signal and a visual alarm in the form of a bright, flashing 360-degree LED on the top and bottom of the device, it is also equipped with a vibrating alarm.

Event logger

The Dräger Pac 3500 can store up to 60 events, along with their dates and times. An infrared interface allows them to be loaded onto the PC, where they can then be used for further analysis.

Bump and function test

The recommended function tests, which are to be performed regularly with a certain gas concentration, ensure that the device always works flawlessly. Using the Dräger Bump Test Station, these tests can be performed within a matter of seconds.

Fast and robust DrägerSensor®

The Dräger XXS sensors boast extremely fast reaction times, thus offering greater safety. The robust sensors can also be used in extreme environmental conditions without triggering a false alarm. The XXS sensors also offer a long functional life of in excess of four years including the Oxygen sensor.

Benefits

Simple differentiation of the devices

The Pac 3500 is equipped as standard with a silver foil covering the keyboard. Foils in different colours help the users to distinguish the devices and therefore the measured gases easily and especially from a distance. You can choose the coloured foils directly with your order.

System components

D-12191-2010

DrägerSensor XXS

A small sensor – a giant step into the future: The new DrägerSensor XXS range is remarkably compact, and boasts an even higher performance than the competition.

D-47907-2012

Dräger X-dock® 5300/6300/6600

The Dräger X-dock® series provides you with full control of your portable Dräger gas detection instruments. Automatic bump tests and calibrations with reduced test gas consumption and short testing times save time and money. Comprehensive documentation and evaluations provide you with a clear overview.

System components

Dräger Bump Test Station

Easy to use, stand-alone and portable. With the Bump Test Station, functionality tests of gas detection and warning devices can be carried out easily and quickly.

Accessories

Leather carrying case

Communication Module

Complete with USB cable

Accessories
