

PRODUCT DATA SHEET

Product ID: RGA26
Description: Light Fall Arrest Block - 6m

Accredited to: EN 360: 2002
Line material: 5mm galvanised steel cable
Case material: Alloy
Connectors: Double action high tensile steel alloy
Weight: 5.2kg
Max. user weight: 136kg
Max. force: <6kN
Features: Fall indicating connector

A lightweight block, the RGA26 is a multi-purpose fall arrest block, which allows uninhibited movement during normal working activity.

The carrying handle is part of the cast alloy housing and can be connected to the anchorage point using soft slings or a connector. The RGA26 is used throughout the industry to provide semi-permanent protection in work areas, and is also used on lorry sheeting gantries in conjunction with a beam trolley (RGBT1). For self-connecting to the block, it is recommended that the operative uses an extension strop (RGL4) in order to ease the task. The RGA26 can be supplied with galvanised or stainless steel wire cable.
