

PRODUCT DATA SHEET

Product ID RGL26
Description: Twin Leg Elasticated Webbing Restraint Lanyard

Accredited to: EN 354: 2010
Material: 36mm water repellent polyester
Fittings: Supplied without connectors unless
 stated otherwise
Features: Twin leg elasticated restraint lanyard
Lengths: 0.75 - 1.2m
 1.05 - 2m

The RGL26 Twin Leg lanyard is an industry standard for restraint lanyards, and normally the minimum equipment issued with a harness for working at height.

This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point. Movement between anchorages can be achieved by means of double clipping. The elastic in the lanyard reduces the amount of hanging slack, which helps to reduce trip hazards and entanglement. This lanyard can be fitted with any compatible EN362 connectors. Do not use for fall arrest.
