

PRODUCT DATA SHEET

Product ID RGL30

Description: Single Leg Webbing Tie Back Lanyard & Shock Absorber

Accredited to: EN 354:2010
EN 355:2002

Material: 26mm water repellent polyester 37kN

Fittings: RGK2P and any compatible EN362 connectors

Max arrest force: < 6 kN

Features:

- Fitted with shock absorber pack
- Colour coded inner loops

Lengths: 1.8m

The RGL30 has been designed to loop around larger structures / anchor points, or for lanyard shortening. Inner loops are colour coded for ease of connection and visibility.

We use 37kN polyester webbing and a water repellent coating to manufacture this product which helps give the product a longer life. This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point.

If movement between anchorages is required, a twin leg lanyard should be used (RGL29) to provide a constant protection.
