

XTIRPA DAVIT ARM SYSTEM

MANHOLE GUARD DAVIT ARM SYSTEM

Manhole guard systems are used when an exposed entry point needs to be guarded. This portable system has an integrated mast which is used in conjunction with a davit arm to provide fall protection, entry and retrieval capabilities. The manhole guard system facilitates access to underground chambers or any other type of confined space where an entry point should be protected. Davit arm is equipped with 5000 lb. (2268 kg) anchor point.
